### **SUPPLEMENTAL DETAILED ACTION**

This is a supplemental Final Office action for the purpose of clarifying typos present in the office action mailed 06/19/2007. The body and content of the rejection has not been changed, but has been clarified to correctly identify claims 13-15 as being the pending/rejected claims.

#### ***Claim Objections***

Claim 13 is objected to because of the following informalities: Claim 13 recites a "surface with both a perimeter having an edge contour..." and "wherein the surface has a surface texture... and visual pattern". There is no support in the specification for the perimeter edge contour having a visual pattern and surface texture. It is suggested the claim be amended to clarify that it is the interior region of the surface has the visual pattern and surface texture.

Appropriate correction is required.

#### ***Claim Rejections - 35 USC § 103***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 13-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Martensson (6146252) in view of Piacente et al (5858160).

Regarding claims 13-15: Martensson discloses a laminated material comprising cellulose sheets impregnated with resin that are mechanically pressed and cut into a product (Col. 3, lines 21-44 and claims 15-19). The product includes a surface with a

Art Unit: 3635

machined edged contour (14 and 18, Figure 2 and Col. 1, lines 21-28) and an interior region (top surface of 13, Figure 2), where in the edge contour lies below the interior region. While the edge contour is shown to have a substantially linear cross-sectional shape from the interior region to an edge of the product (14, Figure 2), Martensson discloses that the edge contour may also have smooth edges, as in forming curved grooves and tenons for floor boards that are joined side by side (Col. 1, lines 21-28). The laminate also comprises one patterned sheet (Col. 3, lines 26-28). Since the patterned sheet is laminated as a layer of the product prior to edge contouring, the pattern will not extend into the edge contour.

Martensson does not disclose the laminated material to have a surface texture that varies in accordance with a visual pattern that imitates another product. Piacente et al. discloses a panel for flooring that has a surface texture that varies in accordance with a visual pattern that imitates another product (Col. 3, lines 26-28; Col. 1, lines 53-57).

In view of Piacente et al., it would have been obvious to one of ordinary skill in the art at the time the invention was made to form the top surface of Martensson's floor panel with impression that follow the underlying décor to enhance the realistic effect of the décor.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
